Health Commissioner's Report – March 2018 Board of Health Meeting

1) Budget/Financial

- As of 2/28/18, the general fund showed a cash balance of \$73,471.21, with our all fund balance at \$1,249,839.19. The general fund balance is low due to the fact that the county's new accounting system had not yet been set up to allow transfers.
- Food service operations and retail food establishments who did not renew their licenses by the March 1st deadline were sent notices that they were operating without a license and had to renew immediately, or face an administrative hearing and possible closure. Locations that did not renew by the March 1st deadline had to pay a mandatory state required 25% penalty.
- Our current server is just over seven years old, and since we have begun scanning our files and documents, we are in need of a new server. Dan Dean contacted Trumbull County Data Processing and they provided a quote, through state purchasing, on a server and software that would meet our needs and be compatible with the county's system. I have attached those quotes for your review. I will be requesting the Board's approval for a new server at the April meeting.

2) Time Study

- Attached is my time study for the month of February. The bulk of my time has been spent on administrative issues, accreditation, sewage and PHEP.

3) Vehicles

- Attached is the cost analysis for the month of February for the vehicles. The overall cost savings with the vehicles, for the month of February, was \$417.50, with a year to date savings of \$907.77.

4) Accreditation

- We are continuing to prepare for our site visit from PHAB, which you all know is scheduled on March 27th & March 28th.
- Natalie Markusic finished addressing the issues for the documents that the PHAB site visitors felt needed further explanation/clarification, or did not fully demonstrate the standard. We are now prepping staff on what to expect during our site visit, and finishing up the remaining cosmetic issues for our building.

5) Policies/Procedures – Revisions (None)

Kathy Parrilla RN, Injury Prevention Coordinator

Figure 1. A monthly count of emergency departments visits due to overdoses in Trumbull County by Zip Codes. There were 41 overdoses during the month of February.

Review of Overdose deaths in Trumbull County is demonstrating the continued increase of Fentanyl and Cocaine but, unfortunately, the return of Methamphetamine in the county as well. Figure 2. Gender distribution of overdose-related ED visits; Trumbull County; February 2018

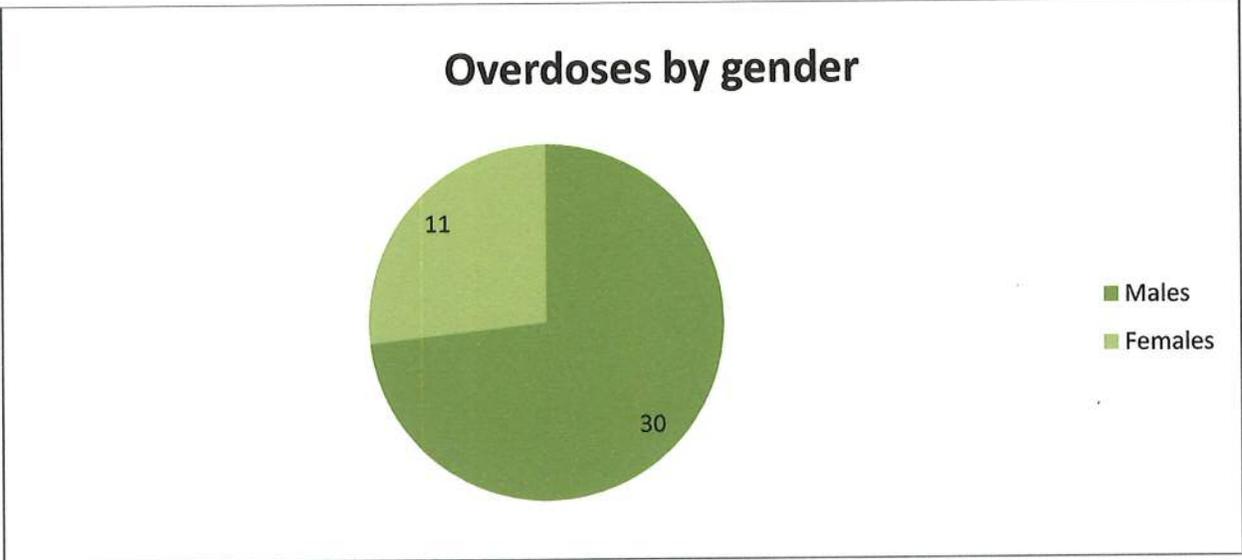

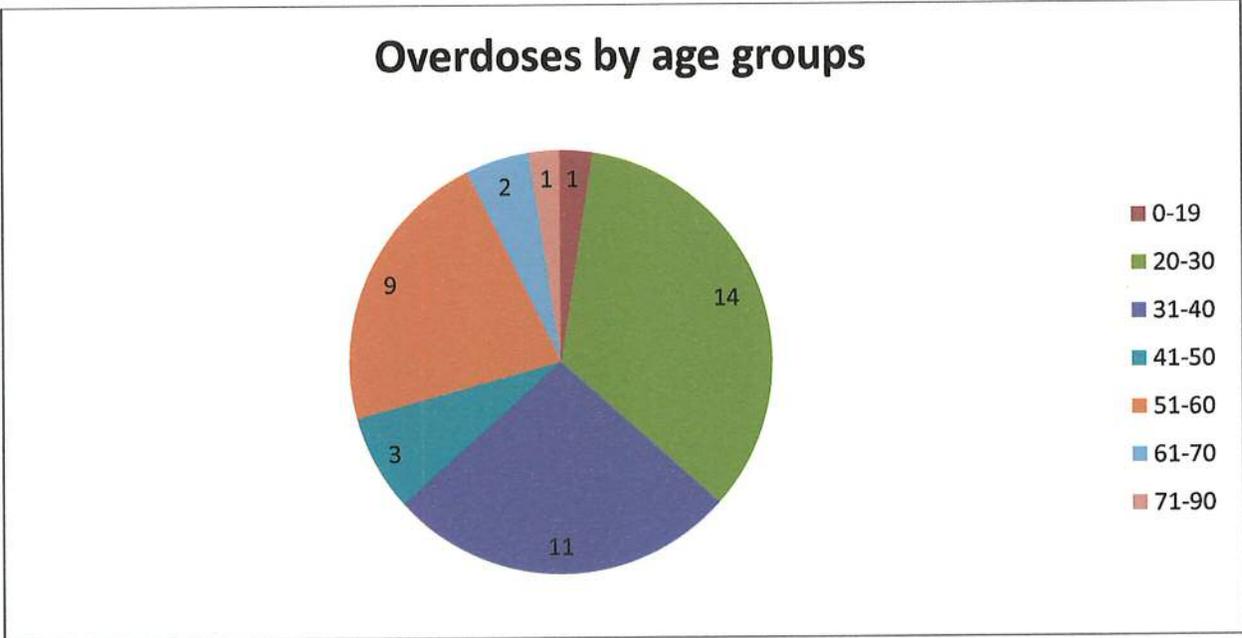

Figure 3. Age distribution of overdose-related ED visits; Trumbull County, February 2018

Age distribution of overdose-related ED visits for January revealed "mean age" of 39 yrs. of age and "median age" of 33 yrs.

Figure 4. Days of the week that the overdoses are occurring.

Raising the Minimum Sales Age of Tobacco Products to 21

The Toll of Tobacco

According to the Campaign for Tobacco-Free Kids, an estimated 20,200 adult Ohioans die per year as a result of their own smoking.ⁱ There are an estimated 259,000 kids now under the age of 18 and alive in Ohio who will ultimately die prematurely from smoking.ⁱⁱ In Ohio, healthcare costs directly caused by smoking have been estimated to total \$5.64 billion annually and of this number, \$1.4 billion is covered by the state Medicaid program.ⁱⁱⁱ

Youth Tobacco Use

Youth use of tobacco remains unacceptably high with new users starting every day.

- National data show that about 95% of adult smokers begin smoking before they turn 21.^{iv}
- Among high school students in 2015, 9.3 percent smoked cigarettes, 16 percent used electronic cigarettes, 7.2 percent used hookah or waterpipes, and 8.6 percent reported smoking cigars.^v
- While cigarette smoking may be on the decline, both electronic cigarette and hookah or waterpipe use appear to be on the rise among youth.^{vi}
- Among young adults aged 18-20 in 2014, 24 percent report smoking cigarettes and 10.5 percent smoking cigars in the last month.^{vii}
- It is important that any effort to address youth initiation include all tobacco products.

A Solution - Tobacco 21

Recommendations to be Included in Any Legislation to Raise the Minimum Age of Sale to 21:

- *Covers all tobacco products, including electronic cigarettes.*
- *Provides public education, training, and technical assistance to retailers.*
- *Implements measures for active enforcement, such as retailer licensing and penalties, including license suspension and revocation.*
- *Does not create new categories of products, which would exempt them from other tobacco control laws.*
- *Does not penalize youth.*
- *Does not preempt other jurisdictions from passing strong tobacco control laws.*

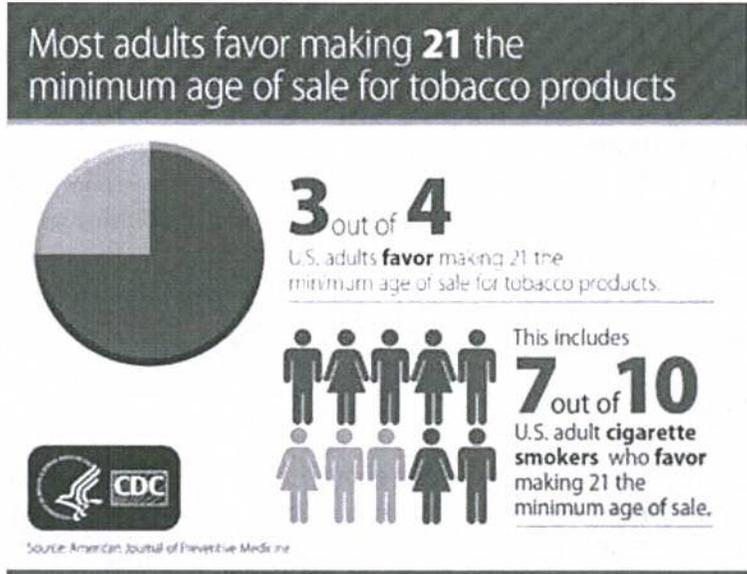

Raising the minimum age for sale of all tobacco products to 21 with strong retailer compliance and active enforcement can be one part of a comprehensive strategy to reduce youth initiation.

Why Tobacco 21? A Case for Support

According to a 2015 study by researchers from CDC and collaborators, 75% of U.S. adults, including 70% of smokers, support raising the minimum age of sales of tobacco products to 21 years of age.^{viii}

It is important to evaluate each proposal as the tobacco industry has specifically used minimum age of sale laws to weaken restrictions on sales to youth, penalize youth, create carve outs for certain products, and to interfere with other effective tobacco control policies. As such, we support legislation that will best protect youth, and not benefit the tobacco industry, when raising the minimum age of sale to the age of 21.

In its March 2015 report, *Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products*, the National Academy of Sciences (NAS) used two models to predict the impact of raising the minimum age of sale to 19, 21, and 25 nationally. The report found that raising the national minimum age of sale to 21 would have a substantially higher impact than raising the age to 19. Further, the two models estimated that raising the minimum age would reduce initiation, tobacco-related morbidity and mortality access across the lifespan, and ultimately save lives. Specifically, the report's modelings predicted that smoking prevalence would decline by 12 percent if the national minimum age of sale was raised to 21. It also predicted that raising the national minimum age of sale to 21 would result in approximately 223,000 fewer premature deaths, 50,000 fewer deaths from lung cancer, and 4.2 million fewer years of life lost for those individuals born between 2000 and 2019.

The NAS report concluded that active enforcement of minimum age of sale laws can reduce underage sales, and additional measures, such as targeted retail education, community education and mobilization, and mass media campaigns can improve retailer compliance.
