

TCCHD Public COVID/Influenza Vaccine Clinics – December 2022

Trumbull County Combined Health District (TCCHD) will host vaccine clinics during the month of December, 2022, offering COVID-19 vaccines (Moderna, Pfizer, Johnson & Johnson, and Novavax vaccines). The clinics will also offer the mRNA bivalent boosters, which strengthen protection against the original COVID-19 strain, as well as the currently circulating Omicron BA.4 and BA.5 variants. You must have completed a primary series to be eligible for the COVID bivalent mRNA booster and be at least 2 months from your primary series or your most recent booster to be eligible. The Pfizer mRNA bivalent is for people 12 years and older and the Moderna mRNA bivalent vaccine is for people 18 years and older. The clinics will also offer flu vaccine.

If you are receiving your additional or booster dose, please be sure to bring your vaccine card with you to your appointment.

Please note that the primary Pfizer vaccine is for individuals 12 years and older and the Pfizer pediatric vaccines are for children 5 years – 11 years old. The infant vaccines, ages 6 months – 4 years, are administered only at the TCCHD office. A parent must be present with all minors for them to receive the vaccine. The primary Moderna, Johnson & Johnson, and Novavax vaccines are for individuals 18 years and older.

The complete list of vaccine providers can be located on the Ohio Department of Health website (www.coronavirus.ohio.gov). Please continue to visit our website (www.tcchd.org) for COVID-19 updates.
